

## Violin

The violin is a member of the string family. Sounds are made by bowing or plucking the strings. It is held under the chin, resting on the shoulder. The violin is the highest voice in the string family. The violin has a lovely tone that can be soft and expressive or exciting and brilliant.

Here are some examples of sounds a violin can make:

[Violin](#)

[Twinkle twinkle little star](#)

[Violin riff](#)

## Cello

The cello is another member of the string family. Sounds are made by bowing or plucking the strings. While shaped like a violin, the cello is much larger and is held between the player's knees. The cello is the middle-low voice of the string family. It can produce beautiful sounds from its lowest to its highest notes.

Here are some examples of sounds a cello can make:

[Cello](#)

[Twinkle twinkle little star](#)

[Cello riff](#)

## Piano

The piano is a keyboard instrument. Sound is produced on the piano when a player presses the keys, which causes small hammers to strike the strings inside the instrument. It is the vibrations of the piano's strings which produces its musical sound. The piano is a versatile instrument and can play in a wide range of styles.

Here are some examples of sounds a piano can make:

[Twinkle twinkle little star](#)

[Piano riff](#)

## French horn

The French horn is a member of the brass family. Brass instruments produce their sound by the player buzzing their lips while blowing air through a cup or funnel shaped mouthpiece. The French horn is known for playing hunting fanfares and tunes, but also beautiful sweeping melodies.

Here are some examples of sounds a French horn can make:

[Twinkle twinkle little star](#)

[Star Wars](#)
